thanks for your honest feedback we are constantly working to improve the player experience and feedback like yours is always of value to us for any technical issues you might have please feel free to reach out to our support team in the game menu settings support

i love this game a lot and when started playing it i just loved it more and more but the more i played it i felt like the spins are rigged in a way or i feel like i just get unlucky every time but then i notice it happens every time to where if there is something going on and you can get a raid or an attack and get 2 for per a hit attack and 3 for a block and then 4 for a raid and 5 for a perfect and it s x s what ever you bet soon as you get both it s like impossible to get another one of either i was betting x10 and had 1200 spins from the tournament i won and i only got i believe two attacks and one raid out of all the spins and i understand it s probably set up a way but i feel like if stuff like that happens it makes the game not as fun because you put in the time to get all theses spins but when you use them you barley get anything and then the second thing is when your playing and say i have 55 spins and and i m betting 30 then i don t win any thing so now i have 25 spins every thing to get more spins pops up and it does it every time and it get frustrating when you just wanna play i would understand if it did it when you completely run out but every time is just over kill and also makes me not as interested in play as much but besides the two things i love the game and i feel like if it weren t for these things it be by far my favorite game

very good app but sometimes they give me few runs and some offers are not useful and i do not update the new offers that have to be updated but if i like it i help me to pass from levelgrasias app i hope they update the offers please

super if i have real coins and spins saved me from waiting like 2 hours to get 5 very good helps you advance very fast very good app the only thing that needs to be done is to download the app login and choose any of the options you want you click on claim now then you will be sent to the game and telodara as a gift that s why i give it 5 stars great

well first of all i ve seen a lot of apps that are this kind of thing and are fake in different games however this app is not like that even though they are not exactly offering coins that give you a good amount thank you very much to the creators they are a past the truth

very good app but sometimes they give me few runs and some offers are not useful and i do not update the new offers that have to be updated but if i like it i help me to pass from levelgrasias app i hope they update the offers please

good game but there are some inconsistencies one of them is the fox that i feed to help me dig up treasure i feed it and it s supposed to be active for 4 hours but 10 20 mins later it s back to sleep seams as if a robot or computer keeps bombing my island and not actually people how is it that the same person is able to bomb my island 7 times in a row and steal my money twice all in a matter of 3 mins i m never able to bomb anyone more than once while playing let alone back to back to back to back too may pop ups about purchasing things once your spins are low which allows others to either bomb you or steal your money while ur busy trying to close about 8 different purchasing options it does this way too often for instance if i m using 15 to bet per spin and i have 20 spins left it will say i m out of spins even though i have 5 spins left then i have to close 8 different purchasing options now i can only bet either 1 5 per spin so if i choose 3 it again says i m out of spins and i have to close yet again the same 8 different purchasing options now i have 2 spins left and if i choose to bet 1 spin after my spins are gone you guessed right another set of 8 purchasing options this is very very annoying and i don t have time to even spend the money to build my island cuz people are stealing it while i m trying to close soooooo many purchasing options that come back to back to back
